FieldCell Product Overview

What is FieldCell

FieldCell is a highly functional finance calculator which runs on a range of mobile phones.

Aimed at

FieldCell is essential for any finance sales staff who need to provide customer quotations while away from the desk: in showrooms or out on the lot; on customer's premises; at trade shows; in the car (though not while actually driving!); indeed anywhere access to a PC or internet-based calculator is inconvenient or impossible.

Suitable for vendors, dealers, finance agents and intermediaries and finance company own staff – anyone who needs a quick and accurate calculation while out-and-about.

Benefits

FieldCell is intuitive and easy to use. Data entry screens are simple to navigate and arranged into logical groupings.

Fully CCA-compliant contract completion report allows quick and error-free completion of customer documentation on-site.

FieldCell facilitates the sales process by allowing you to produce accurate quotations in any situation where use of a PC or laptop is impossible or inappropriate. Quotations can be saved for later use – you can retrieve them when back at the desk, for further analysis or for input into your business origination systems.

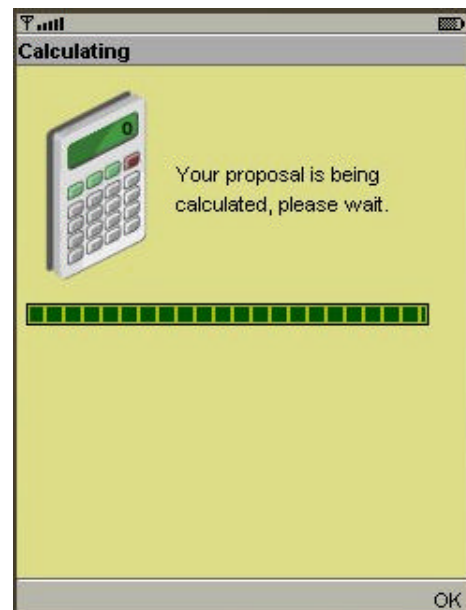

Alternatively, calculations can be uploaded to Field Solutions FieldControl¹ internet system, for later download into your PC or web-based business processing systems.

Range of calculations

FieldCell provides an astonishingly wide range of calculations for a mobile phone application, including:

¹ Requires separate subscription to FieldControl, requires GPRS-enabled phone.

- Hire purchase, loan or lease.
- Cars, commercial vehicles and other assets.
- CCA regulated or unregulated business.
- Calculate payment amount, cost, balloon, subsidy, commission, agreement term, interest rates, etc.
- Quote from margin over cost of funds, nominal rate (IRR), flat rate or CCA-compliant APR.
- Lump sum Deposit and Balloon payments.
- Part-exchange value and settlement against part-exchange.
- Analysis of VAT on hire purchase asset cost, part-exchange and settlement.
- Payment profiles in advance or in arrears, multiple advance payments, if required.
- Payment frequencies monthly, quarterly, semi-annual or annual.
- Seasonal repayment profiles.
- Documentation and hire purchase option fees.
- Documentation fee payable on signing or with first subsequent payment.
- Stage payments.
- Manufacturer subsidy schemes².
- Quick recalculation of interest rates by over-typing calculated money-amount result.

Cheque Required on signing				
		Net	VAT	Total
Deposit		£0.00	£0.00	£0.00
Advance Payments		£939.12	£140.87	£1079.99
Documentation Fee		£95.00	£14.25	£109.25
Total		£1034.12	£155.12	£1189.24

Reports

Following calculation and acceptance of the calculated result, FieldCell presents a specimen document (contract) completion form, showing the financial amounts to be included on the document.

For consumer quotes, the report includes full CCA disclosure, including APR, hire purchase halves & thirds (termination and repossession), and specimen settlement values.

Interface to FieldControl

Completed quotations can be uploaded to Field Solutions' internet-based FieldControl³ system, for onward transmission, either to your own PC⁴ or

into your company's new business system. When used with compatible new business systems, underwriting and acceptance notification can be texted back to your phone in real time.

² For participating manufacturers only.

³ Requires separate subscription to FieldControl, requires GPRS-enabled phone.

⁴ Running compatible Field Solutions pricing software.

Platforms

FieldCell runs on any compatible Java-enabled (J2ME Polish) or Android (Google) phones. Below is a list of some of the more common phones on which the software is being used:
